

CONTENTS

Publisher's Foreword	xiii
Preface to the Original Edition	xv
Editorial Method	xvii
PART I: GENERAL	
1. Introduction	1
2. The Social Problem	12
Beginners in Crime	13
Repeaters	14
The Annual Loss from Inside Theft	16
The greater loss	16
PART II: THEORETICAL CONCEPTS OF INSIDE THEFT	
3. The Accounting Concept of Theft	18
The Theft Sequence	18
The Theft Act: Method and Effect	18
Elemental Methods of Theft	18
Proprietorship Equation Effect of Theft	19
Grand Accounting Classification of Theft	19
Thefts by transfer of possession	19
Thefts by misrepresentation	20
Thefts by transfer of legal title	20
Miscellaneous Thefts	20
The Essential Phase: The Theft Act	21
The Relation of Records to Surveillance	23
4. The Accounting Concept of Larcenous Thefts	25
Group I: Larcenous Thefts Involving Assets	25
Group II: Larcenous Thefts Involving Liabilities	26
Unique Characteristics of All Thefts Involving Proprietorship Equities	26
Group III: Larcenous Thefts Involving Proprietorship Equities	27
5. The Accounting Concept of Manipulative Thefts	29
The Manipulative Theft Act	30
Categories of Accounts Subject to Manipulation	30
Accounts with thieves	30
Accounts with fictitious entities	30
Accounts in which thieves have proprietary interests	30
Accounts with criminal accomplices	30
Accounts with organizations where employees are in criminal collusion	31
Accounts with innocent accomplices	31
Group IV: Manipulative Thefts Involving Assets	31
Group V: Manipulative Thefts Involving Liabilities	33
Group VI: Manipulative Thefts Involving Proprietorship Equities	37

6. The Accounting Concepts of Legal & Miscellaneous Thefts	38
The Legal Theft Act	38
Group VII: Legal Thefts Involving Assets	38
Group VIII: Legal Thefts Involving Liabilities	39
Group IX: Legal Thefts Involving Proprietorship Equities	41
The Miscellaneous Thefts	42
Group X. Thefts of Nonrecorded Items	42
Thefts of Nonrecorded Assets	42
Group XI. Thefts From Employees and Others	43
7. Impact of Theft and Concealment on the Accounts – The Manipulation Equation	46
Real Accounts and Related Inventories Distinguished	46
Inside Theft Has Three Phases	46
Contribution of Double Entry to Control of Inside Theft	47
Birth of the Complement	49
Situation 1. Birth of the complement in larcenous and legal thefts	49
Situation 2. Birth of the complement in manipulative thefts	50
The Nature and Relationship of Fraudulent Credits and Complements	51
The importance of credits to a thief	52
Manipulative thefts	53
The uselessness of debits to a thief	53
Qualities and Characteristics of the Complement	53
The Normal Pattern of Movement of the Complement	55
Important variations in the history of the complement	55
The Reality of Manipulation of Accounts by the Omission of Entries	56
Recorded and unrecorded manipulations	57
Manipulative Debits and Credits versus Bookkeeping Debits and Credits	58
The Manipulation Equation	59
Interpretation of the Manipulation Equation	60
The Effect of Theft and Manipulation on Financial Statements	60
Absorbed complements	61
Deferred complements	61
Desirable improvements in fidelity bonds	62
Effect of deferred complements on income tax liability	63
8. General Aspects of Conversion; Outside Conversion of Checks	64
Audit Surveillance Jurisdiction of Conversions	64
Forms to Which Things That Are Stolen Are Converted	65
<i>Table of Fraudulent Credit Potentials</i>	65
The Methods of Conversion	65
Conversions of Checks	65
Conversions of incoming checks effected outside premises of employer	66
Irregular endorsements	68
Modi operandi common to inside and outside conversions of disbursement checks	69
Conversions of stolen disbursement checks effected outside premises of employer ..	71

9. Inside Conversions of Checks and Conversions of Merchandise	73
Inside Conversion of Checks to Money: Incoming Checks	73
Inside Conversions of Checks to Money: Disbursement Checks	75
Inside Conversions of Checks to Fraudulent Credits	76
Decoy Checks	76
Illustrations of Conversions of Checks to Fraudulent Credits	77
Conversions of Merchandise	78
Conversion Potentials Applied to Stolen Materials	78
Manipulative theft of ingredient amounts	79
On merchandise conversions generally	80
Stolen Property Used as Loan Collateral	80
10. Working Paper Application of Manipulation Equation	81
The Schedule of Details	81
The Correction Equation	91
11. General Observations on the Movements of Complements	94
The Area of Meager Concealment	94
Scope of Surveillance by Auditors	94
Concealment (Movement) of Complements	95
Closely Controlled Accounts	96
Habitat of the fraudulent credit and neutralized complement	97
Loosely Controlled Accounts	98
Habitat of the active complement	98
Movements of Complements Considered as an Accumulating Flow	101
12. The Nature of Manipulations	102
Manipulation	103
The Manipulation of Accounts	104
Qualities and sources of fraudulent credits	105
<i>Table of Sources of Fraudulent Credits and Manipulations Which Utilize Those Sources</i>	106
Primary Manipulation	108
Primary Concealment Manipulation	108
Manipulative Thefts	109
Secondary Manipulation	112
Dependent Complements	113
The Various Complements That Can Come to Rest in Inventory Accounts	115
13. Classification of Fictional Manipulations; Permanent Account Manipulations	116
<i>Table of Classification of Fictional Account Manipulations</i>	116
Permanent Account Manipulations	117
Group I Manipulations: Formal Fraudulent Entries with Factual Bases	118
Diversionary manipulations: Categories 1 and 2	118
Parasitic manipulations: Categories 3 and 4	125
Group II Manipulations: Formal Fraudulent Entries without Factual Bases	130
Category 5: Creation of fraudulent credits by recording fictitious transactions	130
Group III Manipulations: Creation of Fraudulent Credits by Clerical Inaccuracies	132
Category 6: Creation of fraudulent credits by inaccuracies in books and records ..	132
Group IV Manipulations: Creation of Fraudulent Credits by Fraudulent Omissions ...	133
Category 7: Creation of fraudulent credits by omitted debits resulting from omissions to make dutiful entries	133

14. Temporary Account Manipulations	136
Falsification of Accounts	136
Categories of Creation of Fraudulent Credits	137
Category 1: Diversion of factual credits	137
Category 2: Diversion of factual debits	138
Category 3: Increases in factual credits	138
Category 4: Decreases in factual debits	138
Category 5: Recording of fictitious transactions	139
Category 6: Introducing inaccuracies in books and records	140
Category 7: Omitted debits resulting from omissions to make dutiful entries	142
15. Manipulations of Inventories	145
Permanent Concealment by Inventory Manipulation	145
Long-Term Concealment by Inventory Manipulation	147
Falsifications of an Inventory	147
Falsifications of Inventories of Physical Assets	147
Falsifications of Inventories of Receivables and Payables	149
Control-subsidiary manipulations	149
Subsidiary ledger manipulations	151
Falsifications of Inventories of Cash	157
Falsifications of the amounts held by banks	158
Falsifications of the amounts of deposits in transit	159
Falsifications of the liability for outstanding checks	160
16. Use of Disassociation in Concealment	162
The Theft Sequence – Normal Order of Phases	162
The Theft Sequence – Phase Disassociation	165
Definitions Relating to Disassociation	165
Disassociation	165
Disassociation in Accounts	166
Explainable Disassociation in Accounts	166
Incriminating Disassociation in Accounts	166
Disassociation in Time	166
Disassociation in Amount	167
Disassociation in Sequence	167
Documentary Disassociation	167
Definitions Relating to Ancillary Concealment	167
Ancillary Concealment	168
Ancillary Complement	168
Ancillary Credit	168
Conjunction	168
Concealment by Association	169
17. Devices to Bridge the Critical Period	170
The Critical Period	170
Fraudulent Acts and Related Critical Periods	170
Lengths of Critical Periods	171
The plausible explanation	172
Passive waiting	173
Uses of Pre-Theft Concealment by Thieves	175

Chapter 17 (continued)

Warehouses of Active Fraudulent Credits Created by Ancillary Concealment	176
Active-Credit Differences That Result from Warehousing Active Fraudulent Credits ...	176
Retroentry	177
Phases of Theft Sequences that are Subject to Retroentry	177
Effect of retroentry on concealment classifications	178
Relation of Concealment by Retroentry to the Theft Act and Common Patterns	178
Pre-theft concealment by retroentry	178
Concurrent concealment by post-theft retroentry	181
Post-theft concealment by post-theft retroentry	181

PART III. PRACTICE OF AUDIT SURVEILLANCE

18. Lessons from the Evolution of the 20th Century Financial Audit

Applied to Audit Surveillance	183
Extensions of Techniques	184
Reduction of Costs	184
Cost Reduction Through Minimum Area of Surveillance	185
Cost Reduction Through Electronic Accounting	186
Cost Reduction Through Use of Tests	186
Cost Reduction Through Cyclical Audits	193
Cost Reduction by Avoidance of Areas of Excessive Irregularities	194
Cost Reduction by Limited Liability of the Auditor	194
A Doctrine of Possibilities and Probabilities	196
Agreements Between Independent Accountants and Clients	198

19. Orientation of Audit Surveillance

A General System of Protection From Inside Theft	200
Audit Surveillance as a Dedicated Function	205

20. Classification of Audit Surveillance Methods and General Observations

Regarding Procedures	207
Audit Surveillance is Objective	207
Classification of Audit Surveillance Methods	208
<i>Table of Audit Surveillance Methods</i>	208
Tests of Reasonableness	209
Verification Methods	209
Conversion Surveillance	211
General Observations Regarding Procedures	212
Cyclical Auditing	212
Irregular pattern of cyclical auditing	212
Evaluation of internal controls	214
Common Thefts and High-Incidence Areas of Theft	214
Common Thefts	214
High Incidence Areas of Thefts	216

21. Tests of Reasonableness – Trend and Proportional Analysis

Trend Analysis	217
Proportional Analysis	220
When Perfect Isn't	222

22. Verification Methods – The Corroborative Techniques	223
Verification of Journal Entries	223
Objectives in Examination of Recorded Journal Entries	223
Objective of Tests for Omitted Entries	225
Special Considerations of Loosely Controlled Potential Accounts in Application of Corroborative Techniques	226
Accounts with related entries	227
The Variety of Corroborative Data	227
Forgery, Alteration, Concealment, and Destruction of Corroborative Data	228
Extension of Tests to All Levels and Sources of Corroborative Data (the Radical Technique)	229
Method of Extension of Tests to Various Levels of Corroborative Data	231
Corroboration of Entries Affecting Merchandise	233
Non-documentary Physical Evidence	234
Corroboration of Entries in the Purchase Journal	235
Corroboration of Entries in the Purchases Returned Journal	237
Corroboration of Entries in the Cash Receipts Journal	238
Corroboration of Entries in the Cash Disbursements Journal	239
Of credits to cash	240
Of credits to cash discounts earned	241
Of debits to accounts payable and other closely controlled potential accounts	241
Of debits to inventory and other loosely controlled potential accounts	241
Of debits to nominal accounts and to nonpotential real accounts	242
Corroboration of Entries in the Sales Journals	242
I. A secondary concealment that effectively hides complements	243
II. Manipulative thefts	243
23. Verification of Bookkeeping Processes	245
Undistributed and Distributed Complements and Credits	246
The Split-Control Technique	248
24. Account-Inventory Comparisons	250
General Differences Between Account-Inventory Comparisons in Financial Audits and in Surveillance	250
Timing of Account-Inventory Comparisons	252
The Cutoff Shifts	252
Unilateral Account-Inventory Shifts	253
Variety of unilateral account-inventory shifts	253
Unilateral Control-Subsidiary Shifts	255
Variety of unilateral control-subsidiary shifts	255
A Pernicious Form of Bilateral Shift	255
A Unique Unilateral Shift: Lapping	259
Lapping by false book entries	259
Lapping by deferral of book entries	259
Lapping by anticipation of inventory changes	260
Thoroughness of Account-Inventory Comparisons	260
Split-Control Tests as an Integral Step in the Mail Verification of Receivables and Payables	261
Procedural indications of negative split-control test	261
Procedural indications of positive split-control test	263

CONTENTS

xi

Chapter 24 (continued)	
Verification of the Conventional Cash Account	263
Verification of Inventories of Undeposited Cash	265
Unrecorded checks	265
Recorded checks, not on hand, unrelated to bank deposits	267
The Three-Element Verification of Cash	268
Verification of "Balance per Bank Statement"	268
Verification of "Deposit in transit"	268
Verification of "Outstanding Checks"	269
The cutoff bank reconciliation	270
Private investigators in the investigation of cash theft	270
Verification of General Ledger Cash Account	270
25. Conversion Surveillance	271
Section I: Conversions of Disbursement Checks	272
Outside Conversions of Incoming Checks	272
Inside Conversions of Incoming Checks	272
Outside Conversions of Disbursement Checks	273
Fraudulent Payments to Real Entities	273
Criminal conspiracy	273
Connivance	274
Manufactured receipts	274
Fraudulent Payments to Fictitious Entities	274
Conversion surveillance of payments to fictitious entities	275
Fraudulent Payments to Real Entities but Never Delivered	276
Conversion surveillance of payments to real entities, but never delivered to such entities	276
Payments to Inconsistent Payees	279
Inside Conversions of Disbursement Checks	280
Creation of Fraudulent Credits by the Documentation and Recording of Fictitious Cash Disbursements	280
Fictitious disbursements not supported by entries on bank statements	281
Disassociation of contra entries on bank statements	281
Section II: Inside Conversions	286
Inside Conversions of Stolen Checks to Cash	286
Inside Conversions of Stolen Checks to Fraudulent Credits	286
Inside Conversion is Simple to Perpetrate	289
Difficulty of detection	289
Promise of Improvements in Surveillance of Incoming Checks	292
26. The Technique of Oral Inquiry	293
Use of the Oral Technique in Detection and Deterrence of Inside Theft	293
Regarding Categories of Income	296
Regarding Specific Transactions	297
Regarding Information of Other Employees	297
Regarding Observed Irregularities	297
Regarding Relationships Between Accounts	298
Regarding Accessibility of Books and Records	298
Regarding Knowledge or Suspicion of Fraud	299
Electronic Memory	299

27. Development of an Audit Surveillance Program	300
Suggested Initial Introduction of Audit Surveillance	300
Integral Part of Normal Business Operation	302
Appendix A. The Present Position of the Accounting Profession With Respect to its Responsibility for the Detection of Theft	304
Appendix B. <i>The Efficacy of Tests</i> , by Lewis A. Carman	308
Appendix C. Document Authentication, Scrutiny of Handwriting, and Detection of Retroentry	321
Glossary	331
Index	343
